LOOKING FOR A FREE ORTHOTIC SYSTEM?

**SCAN AND MILL IN YOUR LAB
PAY-PER-USE \$25 PER PAIR
START UP COST \$0.**

3 steps to follow..

1. YOU SCAN

You scan using a 3D technology.
You email the scan to our server

2. WE PROCESS

Using 3D software, we turn your foot scan into an orthotic file and we send it to you "Ready2Mill"

3. YOU MILL

You load the "Ready2Mill" file in your CNC, installed in your lab.
You mill EVA orthotics or rigid foam positives.
With very little finishing, you will have an orthotics ready to fit.

You like technology?

You have a lab?

You want to offer a wider variety of orthotics?

Looking to switch to CAD CAM at a minimum cost?

THIS SYSTEM IS IDEAL FOR YOU.

0 dollar is your start up cost.

1 pair milling at a time

3 scanning modes: Foot, Foam box, Slipper cast.

5 different milling contours

10 minutes to mill one side

25 dollars is your cost per pair.

Additional features:

This is not a central fab.

Technology save you on material, storage space, and time.

Possibility of direct milling polypropylene orthotics (Additional cost).

Possibility of milling more than one pair at a time (Additional cost).
